FORM 2
MCH BUDGET DETAILS FOR FY 2009

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: ME

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 3,507,118

A.Preventive and primary care for children:

\$ 2,159,232 (61.57%)

B.Children with special health care needs:

\$ 1,115,845 (31.82%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 232,041 (6.62%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 10,431,736

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 0

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 0

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 10,431,736

\$ 3,903,140

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

\$ 13,938,854

(Total lines 1 through 6. Same as line 15g of SF 424)

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 1,122,354

b. SSDI: \$ 100,000

c. CISS: \$ 0

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 18,154,743

h. AIDS: \$ 0

i. CDC: \$ 722,028

j. Education: \$ 0

k. Other: \$ 0

HIGHWAY \$ 209,802

SAMHSA \$ 524,304

SS FAMILY PLANNING \$ 580,809

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 21,414,040

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 35,352,894

FIELD LEVEL NOTES

1. **Section Number:** Main

Field Name: Children_1_22_TS

Row Name: Children 1 to 22 years of age

Column Name: Title V Total Served

Year: 2009

Field Note:

Several factors contributed to the decrease in numbers served from the prior period. A focus by the Injury Prevention Program away from direct training and TA to schools to training of trainers in districts who in turn train their school staff to implement prevention programs in school districts; and funding constraints due to internal budget allocations to the Oral Health Program in FY07 resulted in terminating grants using the MCHBG state match for support to 3 agencies providing clinical dental services to at-risk children. They maintain services but do not provide data to the OHP. These funds were partially redirected to the SOHP, after a reduction in the OHP's internal allocation from the state general fund, previously used to fully fund the SOHP.

FIELD LEVEL NOTES**1. Section Number:** Main

Field Name: calls_2

Row Name: Number of calls received On the State MCH Hotline This reporting period

Column Name: FY

Year: 2007

Field Note:

Factors contributing to the decrease in calls include: internet access provides a mechanism for those seeking information to obtain program contact information online; travel restrictions result in staff being in their office and able to receive calls from individuals seeking information; and Maine's newly available 2-1-1, part of a national movement to centralize and streamline access to health and human service information and resources, has provided another avenue for individuals to seek out needed services.

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2009
[SEC. 506(A)(1)]
STATE: ME

1. State MCH Administration:
(max 2500 characters)

The Title V Program is administered through the Division of Family Health in the Maine Center for Disease Control and Prevention within the Department of Health and Human Services. Programs included in Title V are: Oral Health, Maine Injury Prevention, Teen and Young Adult Health, Children with Special Health Needs/Genetics, State Systems Development Initiative, Public Health Nursing, Healthy Families, Special Supplemental Nutrition for Women, Infants and Children (WIC), Women's Health, Early Childhood Initiative, and Medical and Epidemiology Consultation.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 3,507,118
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 10,431,736
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 0
7. Program Income (Line 6, Form 2)	\$ 0
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 13,938,854

9. Most significant providers receiving MCH funds:

Family Planning Association of Maine
Public Health Nursing
Children with Special Health Needs
School-Based Health Centers

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	13,969
b. Infants < 1 year old	13,969
c. Children 1 to 22 years old	76,522
d. CSHCN	1,646
e. Others	0

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

School Based Health Clinics, administered by the Teen and Young Adult Health Program represent an excellent example of improved health care access through existing institutions. The Division focus continues to be to increase the number of clinics available as well as expand the scope of services these programs provide, capitalizing on the opportunity to reach this underserved population. A state level advisory group functions to explore opportunities and increase awareness to ensure on-going funding for SBHC. The WIC Program in collaboration with Public Health Nursing is encouraging breastfeeding and developing systems of support for breastfeeding women. More than half of mothers are breastfeeding at hospital discharge. A broad approach focusing on hospitals, individual counseling regarding breastfeeding benefits as well as developing systems of support are being employed in order to substantially increase the incidence and duration of breastfeeding.

b. Population-Based Services:
(max 2500 characters)

Newborn Bloodspot Screening through the CSHN/Genetics Program has been very effective in both screening and identifying those with positive results and connecting them in a timely manner with appropriate medical services. This has been facilitated through the cross match of screening results and birth certificates. The Oral Health Program continues to take proven oral health education programs and expand services, as well as data capability. The Oral Health Program works with multiple stakeholders (state and non-governmental agencies) to increase access to dental care/services. The Public Health Nursing Program provides surveillance of all Sudden Infant Death Syndrome (SIDS) events in the state. Across the state, public health nurses respond to all cases identified as a possible SIDS death offering support and follow up services to families and individuals. During 2005 and 2006 the Family Health Division laid the groundwork to establish a Maternal Infant Mortality and Resiliency Review (MIMRR). Infant deaths classified as SIDS are included in the cases reviewed. The MIMRR reviews will commence in late FY08.

c. Infrastructure Building Services:
(max 2500 characters)

Activities related to the Birth Defects Program have been scaled back slightly as our CDC application to support these activities was approved but not funded. Data collection and review continue until we can garner additional funds to carry out other activities previously outlined. Health care providers are required to report on 19 selected conditions identified at birth or through ongoing health evaluations. Through a Substance Abuse and Mental Health Services Administration (SAMHSA) Grant, the Maine Injury Prevention Program continues to build infrastructure at the school and community level to address the prevention of youth suicide.

12. The primary Title V Program contact person:

Name	Valerie J. Ricker, MSN, MS
Title	Director, Division of Family Health
Address	Key Bank Plaza, 7th Floor, 11 SHS
City	Augusta

13. The children with special health care needs (CSHCN) contact person:

Name	Toni G. Wall, MPA
Title	Director
Address	Key Bank Plaza, 7th Floor, 11 SHS
City	Augusta

Field Level Notes

1. Section Number: Performance Measure #1

Field Name: PM01

Row Name:

Column Name:

Year: 2007

Field Note:

The percent of newborns who are screened and confirmed with conditions mandated by their State-sponsored newborn screening programs (e.g. phenylketonuria and hemoglobinopathies) and who receive appropriate follow up as defined by their State. (National Newborn Screening and Genetic Resource Center)

The Joint Advisory Committee (JAC) for Newborn Screening (NBS) and Children with Special Health Needs (CSHN) recommended in FY06 that the 19 optional screening disorders become part of the mandatory panel. Effective, January 2006, the panel included 28 disorders. During FY07 the JAC undertook a planning process for including cystic fibrosis screening for all newborns. The JAC recommended that it be added in July 2008. The Genetics Program coordinator worked with all stakeholders and interested parties to ensure systems were in place to ensure infants were receiving 100% follow-up in a timely manner.

2. Section Number: Performance Measure #1

Field Name: PM01

Row Name:

Column Name:

Year: 2006

Field Note:

The percent of newborns who are screened and confirmed with conditions mandated by their State-sponsored newborn screening programs (e.g. phenylketonuria and hemoglobinopathies) and who receive appropriate follow up as defined by their State. (National Newborn Screening and Genetic Resource Center)

Indicators prior to 2002 are not accurate for this measure due to a misunderstanding concerning how it should be calculated. The 2002 and 2003 indicators were updated in September 2005 to meet the definitions provided in the block grant guidance.

As of July 2001, Maine screens for 9 mandatory conditions (including hemoglobinopathies) and has an optional panel of 19 metabolic disorders.

3. Section Number: Performance Measure #1

Field Name: PM01

Row Name:

Column Name:

Year: 2005

Field Note:

The percent of newborns who are screened and confirmed with conditions mandated by their State-sponsored newborn screening programs (e.g. phenylketonuria and hemoglobinopathies) and who receive appropriate follow up as defined by their State. (National Newborn Screening and Genetic Resource Center)

Indicators prior to 2002 are not accurate for this measure due to a misunderstanding concerning how it should be calculated. The 2002 and 2003 indicators were updated in September 2005 to meet the definitions provided in the block grant guidance.

As of July 2001, Maine screens for 9 mandatory conditions (including hemoglobinopathies) and has an optional panel of 19 metabolic disorders.

The 2005 indicator was updated for the FY08 application.

PERFORMANCE MEASURE # 02

The percent of children with special health care needs age 0 to 18 years whose families partner in decision making at all levels and are satisfied with the services they receive. (CSHCN survey)

Field Level Notes**1. Section Number:** Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2007**Field Note:**

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. The same questions were used to generate the NPM02 indicator for both the 2001 and the 2005-2006 CSHCN survey.

Maine's value on this indicator is comparable to the national indicator of 57.4%. An objective of 65% is projected for the next administration of the survey. The objectives for 2007 and beyond were changed based in part on a "report card" administered by the Maine Children with Special Health Needs Program to about 40 stakeholders across Maine. These CSHN "Report Cards" are based on the work done by Utah State University, Early Intervention Research Institute's Measuring and Monitoring Community-based System's of Care for CYSHCN. The "report card" is a CQI process that has provided the Maine CSHN Program essential information on the degree to which the program's services, policies and practices are working for families.

2. Section Number: Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2006**Field Note:**

The data reported in 2006 are pre-populated with the data from 2005 for this performance measure.

The 2006 indicator of 62.8 % is the value for Maine from the the first National CSHCN Survey carried out in 2001. It is comparable to the national indicator of 57.5%. An objective of 65% is projected for 2007 when data become available from the second administration of the survey. The objectives for 2007 and beyond were changed this year based in part on a "report card" administered by the Maine Children with Special Health Needs Program to about 40 stakeholders across Maine. These CSHN "Report Cards" are based on the work done by Utah State University, Early Intervention Research Institute's Measuring and Monitoring Community-based System's of Care for CYSHCN. The "report card" is a CQI process that has provided the Maine CSHN Program essential information on the degree to which the program's services, policies and practices are working for families.

The indicators for 1998 to 2001 are NOT percentages. They reflect the average score (on a 0 to 18 point scale) of a family participation questionnaire. The method for determining the score changed in 2000 so that parents themselves answered the questionnaire. This represents a more accurate measure of parental involvement in the CSHN Program.

3. Section Number: Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2005**Field Note:**

The data reported in 2005 are pre-populated with the data from 2004 for this performance measure.

The 2005 indicator of 62.8 % is the value for Maine from the the first National CSHCN Survey carried out in 2001. It is comparable to the national indicator of 57.5%. An objective of 75% is projected for 2007 when data become available from the second administration of the survey.

The indicators for 1998 to 2001 are NOT percentages. They reflect the average score (on a 0 to 18 point scale) of a family participation questionnaire. The method for determining the score changed in 2000 so that parents themselves answered the questionnaire. This represents a more accurate measure of parental involvement in the CSHN Program.

PERFORMANCE MEASURE # 03

The percent of children with special health care needs age 0 to 18 who receive coordinated, ongoing, comprehensive care within a medical home. (CSHCN Survey)

Annual Objective and Performance Data

	2003	2004	2005	2006	2007

Please fill in only the Objectives for the above years. Numerator, Denominator and Annual Indicators are not required for future year data.

Field Level Notes**1. Section Number:** Performance Measure #3

Field Name: PM03

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN Survey, there were wording changes, skip pattern revisions and additions to the questions used to generate the NPM03 indicator for the 2005-2006 CSHCN survey. The data for the two surveys are not comparable for PM #03.

Given the changes in this indicator between the two CSHCN Surveys, we have adjusted our objective for future years to 55%.

2. Section Number: Performance Measure #3

Field Name: PM03

Row Name:

Column Name:

Year: 2006

Field Note:

The data reported in 2006 are pre-populated with the data from 2005 for this performance measure.

The 2005 indicator of 60% is the value for Maine from the first National CSHCN Survey in 2001. This is higher than the national measure of 52.6 %. An objective of 65% is projected for 2007 when data from the next administration of the survey become available. The objectives for 2007 and beyond were changed this year based in part on a "report card" administered by the Maine Children with Special Needs Program to about 40 stakeholders across Maine. These CSHN "Report Cards" are based on the work done by Utah State University, Early Intervention Research Institute's Measuring and Monitoring Community-based System's of Care for CYSHCN. The "report card" is a CQI process that has provided the Maine CSHN Program essential information on the degree to which the program's services, policies and practices are working for families.

The percentages for 1998 to 2001 refer to the original NPM # 3. For 1998 the numerator and denominator were based on estimates from the 1992 National Health Information Survey (NHIS), adjusted for Maine. From 1999-2001, the CSHN Program used an 18% prevalence rate based on the work of Paul Newacheck.

3. Section Number: Performance Measure #3

Field Name: PM03

Row Name:

Column Name:

Year: 2005

Field Note:

The data reported in 2005 are pre-populated with the data from 2004 for this performance measure.

The 2005 indicator of 60% is the value for Maine from the first National CSHCN Survey in 2001. This is higher than the national measure of 52.6 %. An objective of 72% is projected for 2007 when data from the next administration of the survey become available.

The percentages for 1998 to 2001 refer to the original NPM # 3. For 1998 the numerator and denominator were based on estimates from the 1992 National Health Information Survey (NHIS), adjusted for Maine. From 1999-2001, the CSHN Program used an 18% prevalence rate based on the work of Paul Newacheck.

PERFORMANCE MEASURE # 04

The percent of children with special health care needs age 0 to 18 whose families have adequate private and/or public insurance to pay for the services they need. (CSHCN Survey)

Annual Objective and Performance Data

	2003	2004	2005	2006	2007

Field Level Notes**1. Section Number:** Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. The same questions were used to generate the NPM04 indicator for both the 2001 and the 2005-2006 CSHCN Survey.

Due to the current economic climate and proposed cuts to services such as targeted case management and rehabilitation, we don't anticipate improvements in this measure over the next several years. We hope to maintain the current level.

2. Section Number: Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2006

Field Note:

The data reported in 2006 are pre-populated with the data from 2005 for this performance measure.

The 2006 indicator of 67.3% is the value for Maine from the first National CSHCN Survey in 2001. This is higher than the national measure of 59.6 %.

An objective of 70% is projected for 2007 when data from the next administration of the survey become available. The objectives for 2007 and beyond were changed this year based in part on a "report card" administered by the Maine Children with Special Health Needs Program to about 40 stakeholders across Maine. These CSHN "Report Cards" are based on the work done by Utah State University, Early Intervention Research Institute's Measuring and Monitoring Community-based System's of Care for CYSHCN. The "report card" is a CQI process that has provided the Maine CSHN Program essential information on the degree to which the program's services, policies and practices are working for families.

3. Section Number: Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2005

Field Note:

The data reported in 2005 are pre-populated with the data from 2004 for this performance measure.

The 2005 indicator of 67.3% is the value for Maine from the first National CSHCN Survey in 2001. This is higher than the national measure of 59.6 %.

PERFORMANCE MEASURE # 05

Percent of children with special health care needs age 0 to 18 whose families report the community-based service systems are organized so they can use them easily. (CSHCN Survey)

Field Level Notes**1. Section Number:** Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN Survey, there were revisions to the wording, ordering and the number of the questions used to generate the NPM05 indicator for the 2005-2006 CSHCN Survey. The data for the two surveys are not comparable for PM #05.

Due to changes in this indicator between the two CSHCN surveys, we have changed our objective to 90%.

2. Section Number: Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2006

Field Note:

The data reported in 2006 are pre-populated with the data from 2005 for this performance measure.

The 2006 indicator of 77.3% is the value for Maine from the first National CSHCN Survey in 2001. This is comparable to the 74.3 % for the nation as a whole. An objective of 79% is projected for 2007 when the data from the next administration of SLAITS will be available.

The objectives for 2007 and beyond were changed this year based in part on a "report card" administered by the Maine Children with Special Health Needs Program to about 40 stakeholders across Maine. These CSHN "Report Cards" are based on the work done by Utah State University, Early Intervention Research Institute's Measuring and Monitoring Community-based System's of Care for CYSHCN. The "report card" is a CQI process that has provided the Maine CSHN Program essential information on the degree to which the program's services, policies and practices are working for families.

This was a new measure in 2002; no data are available prior to 2002

3. Section Number: Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2005

Field Note:

The data reported in 2005 are pre-populated with the data from 2004 for this performance measure.

The 2005 indicator of 77.3% is the value for Maine from the first National CSHCN Survey in 2001. This is comparable to the 74.3 % for the nation as a whole. An objective of 85% is projected for 2007 when the data from the next administration of SLAITS will be available. This was a new measure in 2002; no data are available prior to 2002.

PERFORMANCE MEASURE # 06

The percentage of youth with special health care needs who received the services necessary to make transitions to all aspects of adult life, including adult health care, work, and independence.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007

Field Level Notes**1. Section Number:** Performance Measure #6

Field Name: PM06

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN Survey, there were wording changes, skip pattern revisions, and additions to the questions used to generate the NPM06 indicator for the 2005-2006 CSHCN Survey. There were also issues around the reliability of the 2001 data because of the sample size. The data for the two surveys are not comparable for PM #06 and the 2005-2006 may be considered baseline data.

Due to substantial changes to this measure between the 2001 and 2005/2006 CSHCN Surveys, we have changed our objective for 2011 (when we anticipate that the next data will be available) to 51%.

2. Section Number: Performance Measure #6

Field Name: PM06

Row Name:

Column Name:

Year: 2006

Field Note:

The data reported in 2006 are pre-populated with the data from 2005 for this performance measure.

The indicator of 14.9% is the value for Maine from the first National CSHCN Survey in 2001. This is comparable to the national indicator of 5.8%. Maine is the only state in the county with sufficient sample size to reliably report on this measure.

An objective of 16% is projected for 2007 when the survey data from the next administration of SLAITS is available. The objectives for 2007 and beyond were changed this year based in part on a "report card" administered by the Maine Children with Special Health Needs Program to about 40 stakeholders across Maine. These CSHN "Report Cards" are based on the work done by Utah State University, Early Intervention Research Institute's Measuring and Monitoring Community-based System's of Care for CYSHCN. The "report card" is a CQI process that has provided the Maine CSHN Program essential information on the degree to which the program's services, policies and practices are working for families.

This was a new measure in 2002; no data are available before 2002.

3. Section Number: Performance Measure #6

Field Name: PM06

Row Name:

Column Name:

Year: 2005

Field Note:

The data reported in 2005 are pre-populated with the data from 2004 for this performance measure.

The indicator of 14.9% is the value for Maine from the first National CSHCN Survey in 2001. This is comparable to the national indicator of 5.8%. Maine is the only state in the county with sufficient sample size to reliably report on this measure.

An objective of 20% is projected for 2007 when the survey data from the next administration of SLAITS is available. This was a new measure in 2002; no data are available before 2002.

PERFORMANCE MEASURE # 07

Percent of 19 to 35 month olds who have received full schedule of age appropriate immunizations against Measles, Mumps, Rubella, Polio, Diphtheria, Tetanus, Pertussis, Haemophilus Influenza, and Hepatitis B.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007

Denominator					

Field Level Notes**1. Section Number:** Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2007**Field Note:**

Percent of third grade children who have received protective sealants on at least one permanent molar tooth.

The 2007 indicator reflects 3rd grade data from the 2003-2004 Maine Child Health Survey. Data were not weighted due to a low response rate (17.6% for kindergarten and 3rd grade combined). A total of 1234 third graders participated in the survey; sealant status was not obtained for 111 (9.0%) of these children. The results reported here are for the 1123 children for whom sealant status was known. Due to the low response rate and high percentage of missing sealant statuses, the results should not be considered generalizable to all 3rd graders in Maine.

The Maine Child Health Survey, which will include an oral health assessment of 3rd graders, is due to be administered in 2009. We anticipate having updated data for the 2010 MCHBG.

The 2003 indicator reflects the percentage of Medicaid-eligible children ages 8 to 9 years who had at least one sealant placed on a permanent tooth. The data do not include children who received dental care through a provider approved for claims bundling such as a federally qualified health center (FQHC) or a rural health center (RHC). The result is an under reporting of children insured through MaineCare who receive any dental services including sealants. The reduction from 2002 to 2003 may also be due to increased number of dental provider organizations that were approved for claims bundling.

2. Section Number: Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2006**Field Note:**

Percent of third grade children who have received protective sealants on at least one permanent molar tooth.

The 2006 indicator reflects 3rd grade data from the 2003-2004 Maine Child Health Survey. Data were not weighted due to a low response rate (17.6% for kindergarten and 3rd grade combined). A total of 1234 third graders participated in the survey; sealant status was not obtained for 111 (9.0%) of these children. The results reported here are for the 1123 children for whom sealant status was known. Due to the low response rate and high percentage of missing sealant statuses, the results should not be considered generalizable to all 3rd graders in Maine.

The 2001-2003 indicators reflect the percentage of Medicaid-eligible children ages 8 to 9 years who had at least one sealant placed on a permanent tooth. The data do not include children who received dental care through a provider approved for claims bundling such as a federally qualified health center (FQHC) or a rural health center (RHC). The result is an under reporting of children insured through MaineCare who receive any dental services including sealants. The reduction from 2002 to 2003 may also be due to increased number of dental provider organizations that were approved for claims bundling.

Prior to 2001, the indicators for this objective came from the 1999 Smile Survey.

It is unknown at this time when the Maine Child Health Survey will be conducted again.

3. Section Number: Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2005**Field Note:**

Percent of third grade children who have received protective sealants on at least one permanent molar tooth.

The 2005 indicator reflects 3rd grade data from the 2003-2004 Maine Child Health Survey. Data were not weighted due to a low response rate (17.6% for kindergarten and 3rd grade combined). A total of 1234 third graders participated in the survey; sealant status was not obtained for 111 (9.0%) of these children. The results reported here are for the 1123 children for whom sealant status was known. Due to the low response rate and high percentage of missing sealant statuses, the results should not be considered generalizable to all 3rd graders in Maine.

The 2001-2003 indicators reflect the percentage of Medicaid-eligible children ages 8 to 9 years who had at least one sealant placed on a permanent tooth. The data does not include children who received dental care through a provider approved for claims bundling such as a federally qualified health center (FQHC) or a rural health center (RHC). The result is an under reporting of children insured through MaineCare who receive any dental services including sealants. The reduction from 2002 to 2003 may also be due to increased number of dental provider organizations that were approved for claims bundling.

Prior to 2001, the indicators for this objective came from the 1999 Smile Survey.

The Maine Child Health Survey of kindergartners and third graders will be conducted again in 2006-2007.

PERFORMANCE MEASURE # 10

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007
Annual Performance Objective	3.5	3.5	3.2	3	3
Annual Indicator	3.4	3.8	3.3	3.5	3.5
Numerator	41	45	38	39	
Denominator	1,195,448	1,174,980	1,149,644	1,126,308	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Field Level Notes**1. Section Number:** Performance Measure #10

Field Name: PM10

Row Name:

Column Name:

Year: 2007

Field Note:

2007 mortality data are not yet available. 2006 data are used as an estimate.

2. Section Number: Performance Measure #10

Field Name: PM10

Row Name:

Column Name:

Year: 2006

Field Note:

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

The 2006 indicator is the 5-year average for 2002-2006. Due to the small number of motor vehicle deaths, a 5-year moving average has been reported since 1999 in order to control for potential large year-to-year random variation.

The ICD-9 codes included in this measure are E810-E825. This includes non-traffic motor vehicle crashes. This is not the same as the HP2010 objective codes, which only include E810-E819. The last 5 years of MV crashes among 0-14 year olds using this definition is:

1998-2002: 31/1235796 = 2.6 per 100,000
 1999-2003: 34/1194879 = 2.8 per 100,000
 2000-2004: 36/1174411 = 3.1 per 100,000
 2001-2005: 32/1149644 = 2.8 per 100,000
 2002-2006: 33/1126308=2.9 per 100,000

Maine is below the Healthy People 2010 goal of 9.2 per 100,000.

3. Section Number: Performance Measure #10

Field Name: PM10

Row Name:

Column Name:

Year: 2005

Field Note:

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

The 2005 indicator is the 5-year average for 2001-2005. Due to the small number of motor vehicle deaths, a 5-year moving average has been reported since 1999 in order to control for potential large year-to-year random variation.

The ICD-9 codes included in this measure are E810-E825. This includes non-traffic motor vehicle crashes. This is not the same as the HP2010 objective codes, which only include E810-E819. The last 5 years of MV crashes among 0-14 year olds using this definition is:

1998-2002: 31/1235796 = 2.6 per 100,000
 1999-2003: 34/1194879 = 2.8 per 100,000
 2000-2004: 36/1174411 = 3.1 per 100,000
 2001-2002: 32/1149644 = 2.8 per 100,000

Maine is below the Healthy People 2010 goal of 9.2 per 100,000.

PERFORMANCE MEASURE # 11

The percent of mothers who breastfeed their infants at 6 months of age.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007

Field Level Notes

1. **Section Number:** Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2007

Field Note:

Data for the 2007 indicator are based on the National Immunization Survey. Starting in 2006, the NIS changed the way they report breastfeeding rates and some of the breastfeeding questions on the survey. Breastfeeding rates are now reported by year of child's birth, rather than by survey year. Therefore, the 2007 indicator represents the percent of children in Maine, born in 2004, who were breastfed for 6 months. Data from the 2005 and 2006 surveys were combined to obtain this estimate.

Our objectives were changed to be aligned with the new reporting methodology.

2. **Section Number:** Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2006

Field Note:

Percent of mothers who breastfeed their infants at 6 months of age.

Data from the 2005 National Immunization Survey; 2006 data are not available.

3. **Section Number:** Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2005

Field Note:

Percent of mothers who breastfeed their infants at 6 months of age.

Data from the 2004 National Immunization Survey; 2005 data are not available.

Data from 2004 PedNSS indicate that 23.8% of WIC mothers breastfeed their infants at 6 months.

PERFORMANCE MEASURE # 12

Percentage of newborns who have been screened for hearing before hospital discharge.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007
Annual Performance Objective	95	75	90	91	96.5
Annual Indicator	98.4	88.9	91.7	95.0	95.3
Numerator	12,883	12,208	12,827	13,307	13,317
Denominator	13,097	13,733	13,988	14,009	13,969

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

Field Level Notes**1. Section Number:** Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2007**Field Note:**

MNHP does not maintain data on those who are screened prior to discharge from a birth facility, only screened/passed/refer by age. Therefore, the numerator for this indicator reflects infants screened by 1 month of age, the closest proxy we have to screening at discharge. The 2005, 2006, and 2007 estimates include all hospitals.

In 2005, babies who had a hearing screen record but both ear results were 'N/A' were counted as having been screened. For 2006 and 2007 data, we did not count those as screens to reflect more accurate reporting.

For 2003 and prior years, this indicator reflected the percentage of newborns who had *access* to a hearing screen before hospital discharge. Beginning in 2004, the indicator reflects the percentage of newborns that were actually screened.

2. Section Number: Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2006**Field Note:**

MNHP does not maintain data on those who are screened prior to discharge from a birth facility, only screened/passed/refer by age. Please fill in only the Objectives for the above years. Numerator, Denominator and Annual Indicators are not required for future year data.

Field Level Notes**1. Section Number:** Performance Measure #13**Field Name:** PM13**Row Name:****Column Name:****Year:** 2007**Field Note:**

2007 data for this indicator are not yet available.

The 2006 indicator reflects analysis of the state data from the pooled 2006 and 2007 Current Population Surveys conducted by the US Census and reported on the statehealthfacts.org Web site. The indicator is for children aged 18 years and under.

Our objectives reflect anticipated future trends. Insurance rates have been increasing with the result that families are being asked to assume larger co-pays and deductibles. Anecdotal information suggests families are beginning to drop their insurance coverage as a result of higher out of pocket expenses. We anticipate these external forces will create the likelihood of increased uninsured rates in future years.

Our objective of 10% by 2012 is influenced by persisting economic uncertainty mixed with freezes in enrollment in Maine's new health care reform, Dirigo Health Plan.

2. Section Number: Performance Measure #13**Field Name:** PM13**Row Name:****Column Name:****Year:** 2006**Field Note:**

Percent of children without health insurance.

Our objective of 9.5% by 2011 is influenced by persisting economic uncertainty mixed with freezes in enrollment in Maine's new health care reform, Dirigo Health.

Not enough time has passed to see the longterm impact of increasing cost of living (heating oil, gas, rent, and food) expenses. In addition, we do not know at this time what the impact of the Dirigo health changes will be. During the most recent legislative session, funding was not approved to expand enrollment. As a result, as of July 1, 2007, enrollment of individuals in Maine's Dirigo health program was temporarily suspended; as of Sept 1, 2007, enrollment will be suspended for small businesses and self-employed as the program looks for ways to cut costs. Furthermore, the Deficit Reduction Act opened the door for states to take the opportunity to make changes in medicaid packages. Maine has not made any changes as yet to MaineCare and we do not know what the impact will be if this occurs.

We will continue to work with the Governor's Office on Health Policy and Finance to monitor over time to determine the anticipated direction of this trend.

3. Section Number: Performance Measure #13**Field Name:** PM13**Row Name:****Column Name:****Year:** 2005**Field Note:**

Percent of children without health insurance.

The 2005 indicator reflects analysis of 2003-2004 state data from the pooled 2005 and 2006 Current Population Surveys conducted by the US Census and reported on the statehealthfacts.org Web site. The indicator is for children aged 18 years and under.

Our objective of 10 % by 2009 is influenced by persisting economic uncertainty mixed with anticipated benefits from Maine's new health care reform, Dirigo Health Plan.

The indicator of 10% reflects anticipated future trends. Insurance rates have been increasing with the result that families are being asked to assume larger co-pays and deductibles. Anecdotal information suggests families are beginning to drop their insurance coverage as a result of higher out of pocket expenses. We anticipate these external forces will create the likelihood of increased uninsured rates in future years.

PERFORMANCE MEASURE # 14

Percentage of children, ages 2 to 5 years, receiving WIC services with a Body Mass Index (BMI) at or above the 85th percentile.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007
Annual Performance Objective				32	31
Annual Indicator			33.6	33.1	
Numerator			3,461		
Denominator			10,298		

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

Field Level Notes

1. **Section Number:** Performance Measure #16

Field Name: PM16

Row Name:

Column Name:

Year: 2007

Field Note:

2007 mortality data are not yet available; 2006 data were used as an estimate.

2. **Section Number:** Performance Measure #16

Field Name: PM16

Row Name:

Column Name:

Year: 2006

Field Note:

The rate (per 100,000) of suicide deaths among youths aged 15 through 19.

The 2006 indicator is the 5-year average for 2002-2006. Due to the small number of suicides, a 5-year moving average has been reported since 1998 in order to control for potential large year-to-year random variation

3. **Section Number:** Performance Measure #16

Field Name: PM16

Row Name:

Column Name:

Year: 2005

Field Note:

The rate (per 100,000) of suicide deaths among youths aged 15 through 19.

The 2005 indicator is the 5-year average for 2001-2005. Due to the small number of suicides, a 5-year moving average has been reported since 1998 in order to control for potential large year-to-year random variation

PERFORMANCE MEASURE # 17

Percent of very low birth weight infants delivered at facilities for high-risk deliveries and neonates.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007
Annual Performance Objective	80	80.5	81	81	81.5

Please fill in only the Objectives for the above years. Numerator, Denominator and Annual Indicators are not required for future year data.

Field Level Notes**1. Section Number:** State Performance Measure #3**Field Name:** SM3**Row Name:****Column Name:****Year:** 2007**Field Note:**

2007 mortality data are not yet available.

2. Section Number: State Performance Measure #3**Field Name:** SM3**Row Name:****Column Name:****Year:** 2006**Field Note:**

The motor vehicle death rate per 100,000 among children 15 to 21 years of age. The number of motor vehicle deaths is a 5 year average of 2002-2006.

This indicator is based on ICD-9 codes E810-E825.

Please note that the HP2010 indicator only includes codes: E810-E819. Based on this definition, Maine's 5-year average motor vehicle death rates for 15-21 years olds are:

1998-2002: 187/610243 = 30.6

1999-2003: 174/619849= 28.1

2000-2004: 164/630463= 26.0

2001-2005: 169/641315 = 26.4

2002-2006: 168/644640=26.1

3. Section Number: State Performance Measure #3**Field Name:** SM3**Row Name:****Column Name:****Year:** 2005**Field Note:**

The motor vehicle death rate per 100,000 among children 15 to 21 years of age. The number of motor vehicle deaths is a 5 year average of 2001-2005.

This indicator is based on ICD-9 codes E810-E825.

Please note that the HP2010 indicator only includes codes: E810-E819. Based on this definition, Maine's 5-year average motor vehicle death rates for 15-21 years olds are:

1998-2002: 187/610243 = 30.6

1999-2003: 174/619849= 28.1

2000-2004: 164/630463= 26.0

2001-2005: 169/641315 = 26.4

STATE PERFORMANCE MEASURE # 4

The percentage of high school students (grades 9-12) who are overweight

Annual Objective and Performance Data					
	2003	2004	2005	2006	2007

Denominator					

Field Level Notes**1. Section Number:** State Performance Measure #6**Field Name:** SM6**Row Name:****Column Name:****Year:** 2007**Field Note:**

Data Sources:

Numerator: Maine Injury Prevention Program

Denominator: Number k-8 public schools in Maine, Maine Department of Education, 2006-2007 (According to Maine Statute, an Elementary school means that portion of a school that provides instruction in any combination of kindergarten through grade 8. Only public schools are included in the denominator).

The number of schools that received a comprehensive bullying prevention program was incorrectly reported in prior years. To date, the Maine Injury Prevention Program has worked with 29 schools to implement a comprehensive bullying prevention program. New training institutes have trained additional school personnel to implement the program, but MIPP has no way of following up with the personnel to determine if the program has been implemented.

The Maine Injury Prevention Program is currently exploring new ways to address bullying prevention in schools and has stopped implementing the bullying prevention curriculum in new schools. This performance measure will continue to be tracked, but will likely change in the new grant period.

2. Section Number: State Performance Measure #6**Field Name:** SM6**Row Name:****Column Name:****Year:** 2006**Field Note:**

Data Sources:

Numerator: Maine Injury Prevention Program

Denominator: Number k-8 public schools in Maine, Maine Department of Education, 2005-2006 (According to Maine Statute, an Elementary school means that portion of a school that provides instruction in any combination of kindergarten through grade 8. Only public schools are included in the denominator).

The Maine Injury Prevention Program is currently exploring new ways to address bullying prevention in schools and has stopped implementing the bullying prevention curriculum in new schools. This performance measure will continue to be tracked, but will likely change in the new grant period.

3. Section Number: State Performance Measure #6**Field Name:** SM6**Row Name:****Column Name:****Year:** 2005**Field Note:**

According to Maine Statute, an Elementary school means that portion of a school that provides instruction in any combination of kindergarten through grade 8. Only public schools are included in the denominator.

STATE PERFORMANCE MEASURE # 7

The rate per 1000 of emergency department visits for asthma among women ages 15-44.

	<u>Annual Objective and Performance Data</u>				
	2003	2004	2005	2006	2007

Field Level Notes

1. **Section Number:** State Performance Measure #8

Field Name: SM8

Row Name:

Column Name:

Year: 2007

Field Note:

This is a developmental measure. The 2006 denominator presented is the number of licensed child care centers in Maine serving children under the age of 6.

2. **Section Number:** State Performance Measure #8

Field Name: SM8

Row Name:

Column Name:

Year: 2006

Field Note:

This is a developmental measure. The 2006 denominator presented is the number of licensed child care centers in Maine serving children under the age of 6.

3. **Section Number:** State Performance Measure #8

Field Name: SM8

Row Name:

Column Name:

Year: 2005

Field Note:

This is a developmental measure. The 2005 denominator presented is the number of licensed child care centers in Maine serving children under the age of 6. Starting in 2007, pilot data should be available to populate this measure.

FORM 12
TRACKING HEALTH OUTCOME MEASURES
[SECS 505 (A)(2)(B)(III) AND 506 (A)(2)(A)(III)]
STATE: ME

Form Level Notes for Form 12

None

OUTCOME MEASURE # 01

The infant mortality rate per 1,000 live births.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007
Annual Performance Objective	5	5	5	5	5
Annual Indicator	5.0	5.2	5.6	5.6	
Numerator	340	355	386	391	
Denominator	68,343	68,674	69,195	69,596	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Provisional

1. Section Number: Outcome Measure 1

Field Name: OM01

Row Name:

Column Name:

Year: 2007

Field Note:

2007 mortality data are not yet available.

2. Section Number: Outcome Measure 1

Field Name: OM01

Row Name:

Column Name:

Year: 2006

Field Note:

The infant mortality rate per 1,000 live births.

The 2006 indicator is the 5-year average for 2002-2006. Due to the small number of infant deaths, we report a 5-year moving average in order to control for potential large year-to-year random variation.

3. Section Number: Outcome Measure 1

Field Name: OM01

Row Name:

Column Name:

Year: 2005

Field Note:

The infant mortality rate per 1,000 live births.

The 2005 indicator is the 5-year average for 2001-2005. Due to the small number of infant deaths, we report a 5-year moving average in order to control for potential large year-to-year random variation.

OUTCOME MEASURE # 02

The ratio of the black infant mortality rate to the white infant mortality rate.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007
Annual Performance Objective	1	1	1	1	1
Annual Indicator	2.4	2.6	2.8	1.3	
Numerator	12	12.8	15.1	7.3	
Denominator	4.9	5	5.4	5.5	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Field Level Notes**1. Section Number:** Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2007

Field Note:

2007 mortality data are not yet available.

2. Section Number: Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2006

Field Note:

The ratio of the black infant mortality rate to the white infant mortality rate.

The 2006 indicator is the 5-year average for 2002-2006. Due to the small number of infant deaths (and especially black infant deaths), a 5-year moving average is reported in order to control for potential large year-to-year random variation.

It is very difficult to make any inferences on the black to white infant mortality rate ratio in Maine due to the extremely small number of black infant deaths each year. There were no black infant deaths in Maine in 2006.

3. Section Number: Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2005

Field Note:

The ratio of the black infant mortality rate to the white infant mortality rate.

The 2005 indicator is the 5-year average for 2001-2005. Due to the small number of infant deaths (and especially black infant deaths), a 5-year moving average is reported in order to control for potential large year-to-year random variation.

It is very difficult to make any inferences on the black to white infant mortality rate ratio in Maine due to the extremely small number of black infant deaths each year.

OUTCOME MEASURE # 03

The neonatal mortality rate per 1,000 live births.

Annual Objective and Performance Data

FIELD LEVEL NOTES

1. **Section Number:** Main

Field Name: Question3

Row Name: #3. Family members are involved in the Children with Special Health Care Needs...

Column Name:

Year: 2009

Field Note:

Family members rated lower in this area over the prior reporting period. They felt we could do more to involve families in the CSHN portion of the block grant. The Program will work on increasing family involvement as their input is important to the work of the program.

2. **Section Number:** Main

Field Name: Question6

Row Name: #6. Family members of diverse cultures are involved in all of the above activities

Column Name:

Year: 2009

Field Note:

Maine continues to build upon the work started in FY07 of establishing 6 Family Advisory Councils (FAC) and Youth Advisory Councils (YAC). The FACs and YACs will be more representative of their community. The CSHN Program will conduct cultural and linguistic competency trainings with the FAC and YAC.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: ME FY: 2009

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Improve Birth Outcomes
2. Improve the safety of the MCH population, including the reduction of intentional and unintentional injuries
3. Improve the respiratory health of the MCH population
4. Increase the proportion of the MCH population who are at a healthy weight and physically active
5. Improve the mental health system of services and supports for the MCH population
6. Foster conditions to improve oral health services and supports for the MCH population
7. Foster the conditions that enable the CSHN Program to move from a direct care focus to a community-based system of care that enables the whole CSHN population to achieve optimal health
8. Foster conditions to expand the medical home model to a comprehensive health home system for the entire MCH population
9. Improve cultural and linguistic competence within the system of services for the MCH population
10. Integrate existing services and supports for adolescents and young adults into a comprehensive system that draws upon their own strengths and needs

FIELD LEVEL NOTES

None

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: ME

SP # 1

PERFORMANCE MEASURE:

The percentage of births in women less than 24 years of age that are unintended.

STATUS:

Active

GOAL

To reduce the incidence of unintended pregnancy in women <24 years of age.

DEFINITION

Numerator:

Number of women <24 surveyed through Pregnancy Risk Assessment Monitoring System (PRAMS) who indicate that just before they got pregnant, they either wanted to be pregnant later or did not want to be pregnant then or anytime in the future.

Denominator:

Number of pregnant women <24 surveyed through PRAMS

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

Increase the proportion of pregnancies among 15-44 year olds that are intended to 70%.

DATA SOURCES AND DATA ISSUES

PRAMS

SIGNIFICANCE

All children should be wanted and loved. Women, particularly women in poverty and adolescents are more likely to experience difficulty raising a child. Their pregnancies are more likely to be high risk. They are more likely to need public assistance, and less likely to obtain appropriate health care for themselves and their children. Providing assurance that pregnancies can occur when families are prepared and desirous of children may help improve health outcomes. We have made great strides in reducing unintended pregnancies in the 15 to 17 year olds. We have made the least improvement in youth 18- 19 years and 20 to 24 years of age. Attention needs to focus on the later two groups.

SP # 2

PERFORMANCE MEASURE:

The percentage of 0-11 month old children enrolled in WIC who were ever breastfed.

STATUS:

Active

GOAL

To obtain the benefits for infants from breastfeeding for at least the first year of life (per AAP and LaLeche recommendations); including nutritional, immunologic and psychosocial benefits. Initiation of breastfeeding is a shared goal of the USDA. Increasing initiation rates is the first step toward attaining the one year goal. Once initiation increases, we will change to a six-month breastfeeding measure.

DEFINITION

Numerator:

Number of infants enrolled in WIC who were born during the reporting period who were ever breastfed.

Denominator:

Number of infants enrolled in WIC who were born during the reporting period.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Increase proportion of mothers who breastfeed their babies during early postpartum period to 75%.

DATA SOURCES AND DATA ISSUES

PedNSS (which is 100% WIC data in Maine)

SIGNIFICANCE

Breastfed infants have as much as 60% fewer visits to the doctor in the first year of life due to improved immunity and nutritional status. Studies also indicate that the maternal-infant bonding of breastfeeding promote security and may reduce the incidence of child abuse. The Maine WIC program has incentives in place to encourage WIC agencies to increase breastfeeding initiation among their clients.

SP # 3

PERFORMANCE MEASURE:

The motor vehicle death rate per 100,000 among children 15 to 21 years of age

STATUS:

Active

GOAL

To reduce the rate of mortality due to motor vehicle related injuries among children ages 15 to 21.

DEFINITION

Numerator:

Number of motor vehicle related injury deaths among children 15 to 21 years of age.

Denominator:

Number of children aged 15 to 21.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Numerator: Death certificates (Maine Office of Data, Research and Vital Statistics) Denominator: Population file (Maine Office of Data, Research and Vital Statistics)

SIGNIFICANCE

Motor vehicle related injuries are the leading cause of death among children age 15 to 21. This also serves as a proxy measure for associated high risk behaviors resulting in primarily unintentional injuries. Multiple interventions should impact positively upon this measure, including license restrictions and education focused upon substance abuse and injury prevention.

SP # 4

PERFORMANCE MEASURE:

The percentage of high school students (grades 9-12) who are overweight

STATUS:

Active

GOAL

To reduce the prevalence of overweight among high school students.

DEFINITION

Numerator:

Number of high school students (grades 9-12) who have a BMI for age > 95th percentile. BMI= Body Mass Index (weight (kg)/height squared (m))

Denominator:

Number of high school students

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

Reduce proportion of children/adolescents (ages 12-19) who are overweight or obese to 5%.

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey (YRBS) (grades 9-12); self-reported height and weight.

SIGNIFICANCE

Overweight and obesity are major public health issues and risk factors for several chronic disease. National data show that the percentage of young people who are overweight has more than doubled in the past 30 years.

SP # <u>5</u>	
PERFORMANCE MEASURE:	The percentage of high school students (grades 9-12) who feel like they matter to people in their community.
STATUS:	Active
GOAL	To obtain the benefits of improving adolescent attachment to their communities including improved self-esteem, decreased suicide ideation, and improved school performance.
DEFINITION	<p>Numerator: Number of high school students (grades 9-12) who report that they "agree" or "strongly agree" that they matter to people in their community.</p> <p>Denominator: Number of high school students in the State of Maine</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Youth Risk Behavior Survey (YRBS) (grades 9-12)
SIGNIFICANCE	This measure was selected based on our desire to look at strengths and not just deficits. It is based in the Search Institute's knowledge regarding the relationship between increased youth assets and decreased risk behavior. Vermont has monitored 5 assets of youth strength for several years and using this indicator moves us toward a shared regional measure. The question was first asked in Maine in the 2005 YRBS.

SP # 6

PERFORMANCE MEASURE:

The percentage of elementary schools that have developed and implemented a comprehensive approach to the prevention of bullying in collaboration with the Maine Injury Prevention Program.

STATUS:

Active

GOAL

To increase the number of schools in the state that are providing a comprehensive approach to reduce the detrimental effects of peer victimization among elementary school students.

DEFINITION

Numerator:

The cumulative number of elementary schools in the State that have developed and implemented a comprehensive approach to bullying prevention to date, in collaboration with the Maine Injury Prevention Program.

Denominator:

The number of elementary schools in the State of Maine.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Maine Injury Prevention Program

SIGNIFICANCE

The MCHB is focusing attention on decreasing bullying in youth 9 through 14 years of age. Bullying often leads to other violent behavior or actions that result in increased morbidity and mortality. The Maine Injury Prevention Program is already directing resources (human and financial) on reducing bullying. Focusing on elementary schools supports changes in behavior at an earlier stage and has the ability to reduce morbidity and mortality related to intentional injury.

SP # 7

PERFORMANCE MEASURE:

The rate per 1000 of emergency department visits for asthma among women ages 15-44.

STATUS:

Active

GOAL

To improve the management of asthma among women of childbearing age to reduce the need for emergency services.

DEFINITION

Numerator:

Number of emergency department visits among women ages 15-44 (Maine residents) for which the principal diagnosis is asthma (439.0-439.9).

Denominator:

The number of women ages 15-44 residing in the State of Maine.

Units: 1000 **Text:** 2

HEALTHY PEOPLE 2010 OBJECTIVE

Reduce hospital emergency department visits for asthma.

DATA SOURCES AND DATA ISSUES

Numerator: Emergency Department dataset, Maine Health Data Organization Denominator: Population dataset, Maine Office of Data, Research and Vital Statistics.

SIGNIFICANCE

Data show that asthma is more prevalent among women compared to men and that women are seen in emergency departments for their asthma more often than men. Clinical providers report a high proportion of asthma symptoms in pregnant women. Emergency department use is a way to assess the efficacy of asthma management plans.

SP # 8

PERFORMANCE MEASURE:

The percent of licensed child care centers serving children age birth to five who have on-site health consultation.

STATUS:

Active

GOAL

To increase the number of licensed child care providers serving children age birth through five that receive annual visits from a child care health consultant.

DEFINITION

The number of center-based child care centers licensed by the Maine Office of Child and Family Services who serve children aged birth through six years that receive and least one visit annually from a child health care consultant.

Numerator:

Number of licensed center-based facilities that serve children under six years of age who have received a visit from a child care health consultant in the past year.

Denominator:

Licensed center-based facilities that serve any child under six years of age.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

N/A

DATA SOURCES AND DATA ISSUES

Maine is moving towards requiring all licensed center-based facilities that serve children under age 6 to have a visit from a health care consultant. As part of this process, a pilot project sponsored by the Maine Division of Early Childhood will begin in Maine's Midcoast Region in 2007. This pilot project will facilitate contact between child care centers and health consultants. Also, as part of this pilot, a database will be developed to track health consultant visits. We anticipate that numerator data for this measure from the pilot program will be available in FY08. Results from the pilot project should lead to statewide implementation, which will include an enhanced data system to track the progress of this state performance measure. Denominator data are available from the Maine Office of Child and Family Services, Office of Child Care and Head Start.

SIGNIFICANCE

Child care health consultants play a critical role in promoting healthy and safe child care environments and supporting education for children, their families, and child care providers. This support specifically includes children with special health care needs. Child care health consultants also improve access to preventive health services such as medical and dental homes, early intervention and family support. This measure is consistent with recommendations from the AAP, APHA, and MCHB/HRSA.

HEALTH SYSTEMS CAPACITY MEASURE # 01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	2003	2004	<u>Annual Indicator Data</u>		2007
	2005	2006			
Annual Indicator	36.1	22.9	22.0	23.5	
Numerator	243	155	149	165	
Denominator	67,374	67,628	67,660	70,245	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Final

Is the Data Provisional or Final?

Final

Provisional

Field Level Notes**1. Section Number:** Health Systems Capacity Indicator #02

Field Name: HSC02

Row Name:

Column Name:

Year: 2007

Field Note:

The percent Medicaid enrollees whose age is less than one year during the reporting year who received at least one initial periodic screen.

2007 indicator is for Federal Fiscal Year 2007 (10/1/06-9/30/07).

This indicator is problematic. Due to Claims Bundling by Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics, we can not accurately count the number of infants receiving EPSDT procedure codes. There is no way to tell if the service is a periodic screening for infants seen in these settings. All we can do is count whether or not the infant had a claim.

There have been several changes in MaineCare staff calculating this measure over the years; we are uncertain as to whether consistent criteria were used across the years.

It is also important to note that the MaineCare data system was changed during FY06 due to problems with old system. This may make comparisons between 2006 and 2005 data difficult to interpret. In January 2005, the MaineCare (Medicaid) Management Information System, referred to as the Maine Claims Management System (MeCMS) went "live," but had several problems with claims processing. Performance of the system was volatile during spring and summer of 2005. Significant improvement occurred in the months following June 2005. Therefore, it is difficult to interpret the increase in the percent served by Medicaid in the 2006 indicator. It may be a reflection of improved data quality rather than an increase in services.

2. Section Number: Health Systems Capacity Indicator #02

Field Name: HSC02

Row Name:

Column Name:

Year: 2006

Field Note:

+The percent Medicaid enrollees whose age is less than one year during the reporting year who received at least one initial periodic screen.

2006 indicator is for Federal Fiscal Year 2006 (10/1/05-9/30/06).

This indicator is problematic. Due to Claims Bundling by Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics, we can not accurately count the number of infants receiving EPSDT procedure codes. There is no way to tell if the service is a periodic screening for infants seen in these settings. All we can do is count whether or not the infant had a claim. The large increase in the numerator in 2000 reflects a greater understanding by Medicaid of what the data means. Specifically, starting in 2000, Medicaid pulled any claim whatsoever, while prior to 2000, it pulled claims by a combination of category of service and procedure codes. The HEDIS methodology of using 11 months of continuous eligibility is not used. The denominator is based on children determined to be Medicaid eligible on a month to month basis. If a child is eligible for any one month, he or she is counted for inclusion. The denominator increased in 2001 primarily due to increased enrollment for the Healthy Maine Prescriptions Rx Program. The Dirigo Health Plan, enacted in 2003, and other state initiatives will hopefully increase this indicator as a result of more people having access to health insurance which includes coverage of preventive health services such as well child checks.

There have been several changes in MaineCare staff calculating this measure over the years; we are uncertain as to whether consistent criteria were used across the years.

It is also important to note that the MaineCare data system was changed during FY06 due to problems with old system. This may make comparisons between 2006 and 2005 data difficult to interpret. In January 2005, the MaineCare (Medicaid) Management Information System, referred to as the Maine Claims Management System (MeCMS) went "live," but had several problems with claims processing. Performance of the system was volatile during spring and summer of 2005. Significant improvement occurred in the months following June 2005. Therefore, it is difficult to interpret the increase in the percent served by Medicaid in the 2006 indicator. It may be a reflection of improved data quality rather than an increase in services.

Is the Data Provisional or Final?

Final

Provisional

Field Level Notes**1. Section Number:** Health Systems Capacity Indicator #03

Field Name: HSC03

Row Name:

Column Name:

Year: 2007

Field Note:

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

The 2007 indicator is for federal fiscal year 2007 (10/1/06-9/30/07).

Prior to the development of SCHIP, Maine's MaineCare (Medicaid) Program covered infants up to 185% FPL. With the addition of the SCHIP program, coverage was expanded to cover infants between 185% and 200% of FPL. This translates to a small number of infants. Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics are permitted to bundle their Medicaid claims. With claims bundling, the Medicaid agency is unable to specifically count the number of persons receiving EPSDT procedure codes, as there is no way to determine if the service was a periodic screen. We believe this results in under reporting for this indicator. There is a significant drop in the percentage of children less than one year of age receiving at least one periodic screen in CY03. To date, the etiology of the drop has not been determined. In 1999, Medicaid blended SCHIP with Title XIX.

It is difficult to interpret any differences between the 2006 indicator and indicators for prior years due to a change in MaineCare staff calculating this measure; we are uncertain as to whether consistent criteria were used across the years. There was a large percentage increase in the 2006 indicator, but this estimate is unlikely to be stable due to the small numbers. It is also important to note that the MaineCare data system was changed during FY06 due to problems with old system. This may make comparisons between 2006 and 2005 data difficult to interpret. In January 2005, the MaineCare (Medicaid) Management Information System, referred to as the Maine Claims Management System (MeCMS) went "live," but had several problems with claims processing. Performance of the system was volatile during spring and summer of 2005. Significant improvement occurred in the months following June 2005. Final

Field Level Notes**1. Section Number:** Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2007

Field Note:

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

This indicator has decreased as the CSHCN program is moving from a direct service program to actively building a community-based system of care. As of July 1, 2005, Maine's CSHN Program is no longer serving clients who receive all of their services through MaineCare (Medicaid). Since the SSI population automatically receive MaineCare, this population has been reduced. The CSHCN program serves only those SSI beneficiaries whose needs cannot be met through MaineCare.

2. Section Number: Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2006

Field Note:

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

This indicator has decreased as the CSHCN program is moving from a direct service program to actively building a community-based system of care. As of July 1, 2005, Maine's CSHN Program is no longer serving clients who receive all of their services through MaineCare (Medicaid). Since the SSI population automatically receive MaineCare, this population has been reduced. The CSHCN program serves only those SSI beneficiaries whose needs cannot be met through MaineCare.

3. Section Number: Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2005

Field Note:

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

This indicator has decreased as the CSHCN program is moving from a direct service program to actively building a community-based system of care. As of July 1, 2005, Maine's CSHN Program is no longer serving clients who receive all of their services through MaineCare (Medicaid). Since the SSI population automatically receive MaineCare, this population has been reduced. The CSHCN program serves only those SSI beneficiaries whose needs cannot be met through MaineCare.

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #05
(MEDICAID AND NON-MEDICAID COMPARISON)
STATE: ME

INDICATOR #05 <i>Comparison of health system capacity indicators for Medicaid, non-Medicaid, and all MCH populations in the State</i>	YEAR	DATA SOURCE	POPULATION		
			MEDICAID	NON-MEDICAID	ALL
a) <i>Percent of low birth weight (< 2,500 grams)</i>	2007	Other	<u>7.3</u>	<u>5.3</u>	<u>6.3</u>
b) <i>Infant deaths per 1,000 live births</i>	2006	Other	<u>2.8</u>	<u>10.3</u>	<u>6.3</u>
c) <i>Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester</i>	2007	Other	<u>83.9</u>	<u>91</u>	<u>87.2</u>
d) <i>Percent of pregnant women with adequate prenatal care(observed to expected prenatal visits is greater than or equal to 80% [Kotelchuck Index])</i>	2007	Other	<u>76.7</u>	<u>97.7</u>	<u>86.5</u>

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06(MEDICAID ELIGIBILITY LEVEL)
STATE: ME

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's Medicaid programs for infants (0 to 1), children, Medicaid and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL MEDICAID (Valid range: 100-300 percent)
a) <i>Infants (0 to 1)</i>	2006	<u>200</u>
b) <i>Medicaid Children</i> (Age range <u>1</u> to <u>5</u>) (Age range <u>6</u> to <u>19</u>) (Age range <u> </u> to <u> </u>)	2006	<u>150</u> <u>150</u> <u> </u>
c) <i>Pregnant Women</i>	2006	<u>200</u>

STATE: ME

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's SCHIP programs for infants (0 to 1), children, SCHIP and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL SCHIP
a) <i>Infants (0 to 1)</i>	2006	<u>200</u>
b) <i>Medicaid Children</i> (Age range <u>1</u> to <u>5</u>) (Age range <u> </u> to <u> </u>) (Age range <u> </u> to <u> </u>)	2006	<u>200</u> <u> </u> <u> </u>
c) <i>Pregnant Women</i>	2006	<u>200</u>

FORM NOTES FOR FORM 18

None

FIELD LEVEL NOTES

1. Section Number: Indicator 05

Field Name: LowBirthWeight

Row Name: Percent of ow birth weight (<2,500 grams)

Column Name:

Year: 2009

Field Note:

Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2007.

All: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2007.

Non-Medicaid: Calculated by subtracting the Medicaid number of low birthweight babies from the All number of low birthweight babies and dividing that by the number of All live births minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year), this figure is a rough estimate, rather than an actual value.

Maine's Office of MaineCare Services staff have indicated that there are some concerns about the birth information in the MaineCare data system. Another potential data source for this indicator is the 2006 PRAMS survey, which found that 7.3% of MaineCare births were low birthweight, compared with 4.8% of non-MaineCare births and 6.0% of all births statewide.

2. Section Number: Indicator 05

Field Name: InfantDeath

Row Name: Infant deaths per 1,000 live births

Column Name:

Year: 2009

Field Note:

Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2007. MaineCare manually matched the names on a list of infant deaths (provided by the Office of Data, Research and Vital Statistics at the Maine CDC) against the MaineCare database. Due to the manual match technique used, it is possible that some deaths were missed. The low number of infant deaths in the state each year also makes this comparison difficult to interpret.

Non-Medicaid: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2006. Mortality data are not yet available for 2007.

All: Calculated by subtracting the Medicaid number of infant deaths from the All number of infant deaths and dividing that by the number of All live births minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year), this figure is a rough estimate, rather than an actual value.

3. Section Number: Indicator 05

Field Name: CareFirstTrimester

Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester

Column Name:

Year: 2009

Field Note:

Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2007.

All: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2007.

Non-Medicaid: Calculated by subtracting the Medicaid number of infants born to pregnant women receiving prenatal care starting in the first trimester from the All number of infants born to pregnant women receiving prenatal care beginning in the first trimester and dividing that by the number of All live births minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year), this figure is a rough estimate, rather than an actual value.

Office of MaineCare Services staff have indicated that there are some concerns about the birth information in the MaineCare data system. Another potential data source for this indicator is the 2006 PRAMS survey, which found that 90.1% of women enrolled in MaineCare received prenatal care during the first trimester, compared with 95.9% of women who were not enrolled in MaineCare and 93.2% of women statewide.

4. Section Number: Indicator 05

Field Name: AdequateCare

Row Name: Percent of pregnant women with adequate prenatal care

Column Name:

Year: 2009

Field Note:

Data sources:

Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2007. The statistic is calculated including all births. It is not restricted to only women age 15-44.

All: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2007. Data are restricted to only those age 15-44.

Non-Medicaid: Calculated by subtracting the Medicaid number of pregnant women with adequate prenatal care from the All number of pregnant women with adequate prenatal care and dividing that by the number of All women giving birth minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year) and slightly different denominators (women giving birth vs. live births; age differences), this figure is a rough estimate, rather than an actual value.

Office of MaineCare Services staff have indicated that there are some concerns about the birth information in the MaineCare data system. As such, we also present the following values from the 2005 PRAMS survey:

"Medicaid" population: 82.2%

"Non-Medicaid" population: 92.2%

"All" population: 87.5%

(Note: For the PRAMS analysis, a woman was considered to be in the "Medicaid" population if she reported that she was enrolled in Medicaid/MaineCare just before pregnancy or that Medicaid/MaineCare was one of the payers for her prenatal care or delivery.)

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: ME

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	No
Annual linkage of birth certificates and WIC eligibility files	2	Yes
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: ME

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other: Maine Youth Tobacco Survey/Maine Youth Drug and Al	3	Yes

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

None

FORM 20
HEALTH STATUS INDICATORS #01-#05
MULTI-YEAR DATA
STATE: ME

Form Level Notes for Form 11

None

HEALTH STATUS INDICATOR MEASURE # 01A

The percent of live births weighing less than 2,500 grams.

	<u>Annual Indicator Data</u>				
	2003	2004	2005	2006	2007
Annual Indicator	6.5	6.4	6.8	6.8	6.3
Numerator	904	894	963	966	893
Denominator	13,846	13,932	14,111	14,152	14,102

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer
 than 5 and therefore a 3-year moving average cannot be
 applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Provisional

Provisional

Field Level Notes**1. Section Number:** Health Status Indicator #03B

Field Name: HSI03B

Row Name:

Column Name:

Year: 2007

Field Note:

2007 mortality data are not yet available.

2. Section Number: Health Status Indicator #03B

Field Name: HSI03B

Row Name:

Column Name:

Year: 2006

Field Note:

The death rate per 100,000 for unintentional injuries among children aged 14 years and younger due to motor vehicle crashes. (Injuries)

Child Motor Vehical Crash Mortality is calculated as a five year average. Thus, the indicator reported for 2006 of 3.5 represents a five year average for 2002-2006.

This indicator includes ICD-9 codes E810-E825. This is a slightly different definition than Healthy People 2010, which only includes E810-E819, but is consistent with prior years.

3. Section Number: Health Status Indicator #03B

Field Name: HSI03B

Row Name:

Column Name:

Year: 2005

Field Note:

The death rate per 100,000 for unintentional injuries among children aged 14 years and younger due to motor vehicle crashes. (Injuries)

Child Motor Vehical Crash Mortality is calculated as a five year average. Thus, the indicator reported for 2005 of 3.3 represents a five year average for 2001-2005.

This indicator includes ICD-9 codes E810-E825. This is a slightly different definition than Healthy People 2010, which only includes E810-E819, but is consistent with prior years.

HEALTH STATUS INDICATOR MEASURE # 03C

The death rate per 100,000 from unintentional injuries due to motor vehicle crashes among youth aged 15 through 24 years.

	2003	2004	Annual Indicator Data		2007
			2005	2006	
Annual Indicator	28.0	26.5	27.0	27.9	
Numerator	234	225	236	242	
Denominator	835,218	849,929	872,800	868,006	

Check this box if you cannot report the numerator because

Denominator	176,994	180,402	182,012	171,682	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Field Level Notes

1. **Section Number:** Health Status Indicator #04C

Field Name: HSI04C

Row Name:

Column Name:

Year: 2007

Field Note:

2007 hospitalization data are not yet available.

2. **Section Number:** Health Status Indicator #04C

Field Name: HSI04C

Row Name:

Column Name:

Year: 2006

Field Note:

The rate per 100,000 of nonfatal injuries due to motor vehicle crashes among youth aged 15 through 24 years. (Injuries)

Numerator = # of 2006 hospitalizations among 15-24 year old Maine residents for which the principal diagnosis is an injury, the first valid e-code is for motor vehicle traffic, and the patient's disposition is not "expired."

Denominator=US Census Bureau estimate for 15-24 year olds in Maine as of July 1, 2006.

3. **Section Number:** Health Status Indicator #04C

Field Name: HSI04C

Row Name:

Column Name:

Year: 2005

Field Note:

The rate per 100,000 of nonfatal injuries due to motor vehicle crashes among youth aged 15 through 24 years. (Injuries)

Numerator = # of hospitalizations among 15-24 year old Maine residents for which the principal diagnosis is an injury, the first valid e-code is for motor vehicle traffic, and the patient's disposition is not "expired."

Denominator=US Census Bureau estimate for 15-24 year olds in Maine as of July 1, 2005.

HEALTH STATUS INDICATOR MEASURE # 05A

The rate per 1,000 women aged 15 through 19 years with a reported case of chlamydia.

	Annual Indicator Data				
	2003	2004	2005	2006	2007
Annual Indicator	<u>13.8</u>	<u>13.1</u>	<u>13.6</u>	<u>15.1</u>	<u>15.2</u>

FORM NOTES FOR FORM 21

Health Status Indicator 6A/6B:
Source: US Census Bureau as of July 1, 2007

Health Status Indicators 9A / 9B:

- Readers should be very cautious when comparing numbers on the "All children 0 through 19" line with the numbers for any given program due to the following reasons:
a) The "All children" numbers (obtained from the U.S. Census Bureau) use a different set of race categories than that used by most programs. As such, a given child could be counted in different race categories on different lines of the form. For example, a child whose mother was white and whose father was black would be included in the "More than one reported" category on the "All children" line, but might be included in the "Black or African American" category on the "Number enrolled in Medicaid" line. (This likely is a major part of the explanation why there appear to be more Black or African children enrolled in the Medicaid program than are living in the state.)
b) Race is unknown for a large proportion of the children in certain programs.
c) The "All children" numbers are estimates; the program numbers are actual counts.
d) The "All children" numbers are as of July 1, 2007; many of the program numbers are from other time periods.
e) The "All children" numbers are for 0-19 year olds; the WIC numbers are for 0-4 year olds.
We strongly recommend that readers do not calculate percentages using the "All children" numbers as the denominator.

Health Status Indicator 11:
Data Source: Current Population Survey, 2007

Health Status Indicator 12:
Data Source: Current Population Survey, 2007

FIELD LEVEL NOTES

1. **Section Number:** Indicator 09A
Field Name: HSIRace_Children
Row Name: All children 0 through 19
Column Name:
Year: 2009
Field Note:
Data from US Census as of July 1, 2007.

2. **Section Number:** Indicator 09A
Field Name: HSIRace_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2009
Field Note:
Data Source: American Community Survey, 2006

Only data on white vs other race were available. Data on specific races were not available due to small numbers.

3. **Section Number:** Indicator 09A
Field Name: HSIRace_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2009
Field Note:
Counts were obtained from the Maine Bureau of Family Independence for 0-19 year olds in calendar year 2007. These numbers should be viewed as estimates--race was unknown for 13.5% of the 0-19 year old TANF clients.

The Total percent in TANF (Grant) families is an estimate based on numerator data from the Maine Bureau of Family Independence for calendar year 2007 and denominator data from the US Census Bureau for July 1, 2007.

4. **Section Number:** Indicator 09A
Field Name: HSIRace_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2009
Field Note:
Data Source: Office of MaineCare Services, FFY 2007

Race and ethnicity data are not collected separately by MaineCare. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are represented in 9B.

5. **Section Number:** Indicator 09A
Field Name: HSIRace_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2009
Field Note:
Data Source: Office of MaineCare Services, FFY07

Race and ethnicity data are not collected separately by MaineCare on SCHIP clients. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are represented in 9B.

6. **Section Number:** Indicator 09A
Field Name: HSIRace_FoodStampNo
Row Name: Number enrolled in food stamp program
Column Name:
Year: 2009
Field Note:
Data Source: Maine Bureau of Family Independence for 0-19 year olds for calendar year 2007. Race was unknown for 14.8% of 0-19 year old food stamp clients.

7. **Section Number:** Indicator 09A
Field Name: HSIRace_WICNo
Row Name: Number enrolled in WIC
Column Name:
Year: 2009
Field Note:
Data from the Maine WIC program for calendar year 2007.

8. **Section Number:** Indicator 09A
Field Name: HSIRace_JuvenileCrimeRate

Row Name: Rate (per 100,000) of juvenile crime arrests

Column Name:

Year: 2009

Field Note:

Juvenile arrest rate by race includes youth under age 18. Data are from 2006. The denominator for this indicator is from the US Census estimates as of July 1, 2006 and includes those 0-17 years only. Asian and Pacific Islander race data are not collected separately, nor is there a multiple race category. Data are from the Maine Department of Public Safety's Uniform Crime Reports.

9. **Section Number:** Indicator 09A

Field Name: HSIRace_DropOutPercent

Row Name: Percentage of high school drop-outs (grade 9 through 12)

Column Name:

Year: 2009

Field Note:

Percentage of high school drop-outs (grade 9 through 12), by race.

Data are for the 2005-2006 school year. 2006-2007 data were not available.

The Maine Department of Education's data system does not code Hispanic ethnicity separately from race (i.e., "Hispanic" is one of the race categories). They are in the unknown race category. Also, the Asian value reported here is for Asian and Pacific Islanders combined. More than one race reported is also not collected.

10. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_Children

Row Name: All children 0 through 19

Column Name:

Year: 2009

Field Note:

Data Source: US Census Bureau estimates as of July 1, 2007

11. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_SingleParentPercent

Row Name: Percent in household headed by single parent

Column Name:

Year: 2009

Field Note:

Source: American Community Survey, 2006. Hispanic ethnicity was not available due to the small sample size.

12. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_TANFPercent

Row Name: Percent in TANF (Grant) families

Column Name:

Year: 2009

Field Note:

Counts were obtained from the Maine Bureau of Family Independence for 0-19 year olds in calendar year 2007. These numbers should be viewed as estimates--Hispanic ethnicity was unknown for 12.4% of the 0-19 year old TANF clients.

The Total percent in TANF (Grant) families is an estimate based on numerator data from the Maine Bureau of Family Independence for calendar year 2007 and denominator data from the US Census Bureau for July 1, 2007.

13. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_MedicaidNo

Row Name: Number enrolled in Medicaid

Column Name:

Year: 2009

Field Note:

Data Source: Office of MaineCare Services FFY2007

Race and ethnicity data are not collected separately by MaineCare. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are represented in 9B.

14. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_SCHIPNo

Row Name: Number enrolled in SCHIP

Column Name:

Year: 2009

Field Note:

Data Source: Office of MaineCare Services FFY2007

Race and ethnicity data are not collected separately by MaineCare. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are represented in 9B.

15. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_FoodStampNo

Row Name: Number enrolled in food stamp program

Column Name:

Year: 2009

Field Note:

Data Source: Maine Bureau of Family Independence for 0-19 year olds for calenday year 2007. Ethnicity was unknown for 12.6% of 0-19 year old food stamp clients

16. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_WICNo

Row Name: Number enrolled in WIC

Column Name:

Year: 2009

Field Note:

Data from the Maine WIC program for calendar year 2007.

17. **Section Number:** Indicator 09B

Field Name: HSIEthnicity_JuvenileCrimeRate

Row Name: Rate (per 100,000) of juvenile crime arrests

Column Name:

Year: 2009

Field Note:

Data Source: Maine Department of Public Safety, Uniform Crime Reports, 2006

Ethnicity not available on juvenile arrests. Data include only youth age 0-17 years.

18. Section Number: Indicator 09B

Field Name: HSIEthnicity_DropOutPercent

Row Name: Percentage of high school drop-outs (grade 9 through 12)

Column Name:

Year: 2009

Field Note:

Percentage of high school drop-outs (grade 9 through 12), by Hispanic ethnicity.

Data are from 2005-2006 (2006-2007 data were not yet available). The Maine Department of Education does not collect race and Hispanic ethnicity information separately. The "Total Hispanic or Latino" value reported here is for those students for whom race is coded as Hispanic.

19. Section Number: Indicator 09A

Field Name: HSIRace_FosterCare

Row Name: Number living in foster home care

Column Name:

Year: 2009

Field Note:

This is the count of children ages 0-19 years who are in the care of the Maine Department of Health and Human Services, where the Department is the court appointed guardian and the children are living in a community foster home (not an institutional setting).

Data are a point-in-time estimate, as of February 25, 2008 rather than for the entire year.
